- Managed negotiations and term sheets with investors.
- Represented the business in investor forums.
- Managed IP and patent issues.
- Raised close to 1M dollars in private VC and government funds.

EDUCATION AND PAST WORK

My educational/career path started with being a musician which taught me attention to detail, the value of practice and team work (i.e. playing in an orchestra).

Further study through the 3 years Alexander Technique Teacher training course and the practice that followed equipped me with skills in communication and group leadership.

My professional development in the business and IT fields is built on my past careers and past learning along with a methodical self-learner attitude and ability to gain knowledge from mentors and colleagues, occasional short and informal courses, keen observation and good old trial and error. Through practicing these skills and applying regular self-reflection over many years, I have achieved a high level of proficiency.

CREDENTIALS
